

List config

The screenshot shows the 'List Config' page in the Viralist Admin panel. The page has a dark sidebar on the left with navigation options: Dashboard, Categories, Lists, Users, Config, Widgets, Languages, Pages, Re-generate Sitemap, and Change password. The main content area is titled 'List Config' and contains a 'List Configuration' section with the following options:

- Grid style:** A dropdown menu set to 'three-column'. Below it, a note says 'The style of the grid showing the list of 'Lists''.
- Enable Facebook comments for lists?:** A toggle switch set to 'YES'. Below it, a note says 'Display Facebook comments box below list results after a user finishes a list'.
- Show share preview:** A toggle switch set to 'YES'. Below it, a note says 'Show share 'preview' with image below a list on the 'view list' page'.
- Auto-approve user-created lists:** A toggle switch set to 'YES'. Below it, a note says 'If this option is enabled, all new lists created by the users will be automatically approved and published on the site'.
- Auto-approve all updates to already approved lists:** This option is listed at the bottom of the configuration section.

The List config page contains all the configuration related to lists.

The configuration options are:

- 1. Grid style**

Viralist supports **2-column** and a **3-column** layout. Use this option to switch between the two.

- 2. Enable Facebook comments for lists?**

- 3. Show share preview**

Show share 'preview' with image below a list on the 'view list' page that encourages users to share

- 4. Auto-approve user-created lists**

If this option is enabled, all new lists created by the users will be automatically approved and published on the site

- 5. Auto-approve all updates to already approved lists**

If auto-approve is disabled and this option is enabled, all updates(edits) to lists which are already approved will be automatically accepted and published on the site. If 'Auto-update'(the above option) is disabled, this option is discarded and updates will always be automatically approved.

6. Maximum File upload size (in MB) for user uploads

The maximum size of a file(image) a user could upload.

Important: Should not be higher than the the 'upload_max_filesize' and 'post_max_size'. If the maximum upload size supported by your server is lower than the value you provide here, this value will have no effect.

7. Number of lists per page

8. You may also like Shortcode - The short-code used to display 'You may also like' list. Refer the [list of available shortcodes in the documentation here](#).

9. View list page mode

Either to show all items in a single page or each item in a new page with "Next" and "Previous" buttons

10. Number of list items after which an Interstitial ad should be shown(with a skip button).

[Used only in 'multi-page' mode]. Choose 0 to disable. You can set the AD code in the widgets page.

11. Enable 'List edited' Notification

Enable/Disable notifications for a user when a list created by him/her is edited by another user.

12. 'List edited' Notification email 'subject' template

The template for notification email SUBJECT. You can use **variables** in the template which will be replaced by relevant value by Viralist. For example, to add the recipient's name in the email use **[RecipientName]**. You can refer to all the available variables by clicking the "**Variables reference**" link below the field.

13. 'List approved' Notification email 'subject' template

It also supports variables like the above field

14. Add user's name and profile picture on List preview images on Social Media

Enable/disable adding user's name and profile picture on List preview images on Facebook, Twitter, etc(OG image)
