

Widgets and Languages

Widgets

Widgets add content and features to your Sidebars. Examples includes Facebook like plugin, Advertisements and any other features you want to put in the script.

Adding Widgets

To add and edit widgets go to Admin > Widgets.

To add or edit a Widget:

1. To add new widget, click on the add new button
2. To edit an existing widget click on the edit button on the existing Widget section.
3. Set the Text Widget Title (optional).
4. Add the text or HTML code to the box or edit what is currently there.
5. Set Widget to enable or disable.
6. Click Save to save the Widget.
7. You can also change the position of the widgets by dragging them up and down.
8. Switch tabs in your browser and preview the results and make changes if necessary.

Widget Areas

While widget areas typically occur in webpage sidebars in Viralist it includes

1. Sidebar
2. Footer
3. Below list
4. Home Header
5. Above list of lists (In the popular, latest pages, etc)
6. Below list of List
7. Common Footer Section
8. Links in Navbar
9. Above list
10. Below navbar
11. **Interstitial AD pages between items**

Shown in the "Skip AD" pages between list items if this setting is enabled in "**List config**" in admin panel.

Languages

You can add your own languages to translate all the texts included in Viralist(not the lists and other contents).. For examples you can change the text for login button in your own preferred language. English is built in. Any other language you want to add can be added at Admin>Language. And activate the language you added by changing the "Active language" field.
