

Shortcodes

Viralist has Wordpress style short codes to help you display special content on widget sections easily. You can include these short codes in the correct format in widgets and SocioQuiz will automatically display the corresponding content at that place.

As of now, Viralist supports 4 short codes.

1. **Latest lists** : [latest_lists]
Displays the latest lists
2. **Random lists** : [random_lists]
3. **Popular lists**: [popular_lists]

Shortcode Options: Options help customize the usage of each shortcode. Currently all of the above shortcodes has only one option: "limit"

Option "**limit**" could be used to set the maximum number of lists to be displayed.

Usage example: [**latest_lists limit=2**] will display 2 of the latest lists on your site.
